PROFESSIONAL SUMMARY

Third-year Software Engineering student (FUTA) and fullstack developer who builds responsive, accessible web interfaces with React, Next.js, TypeScript, and Tailwind CSS. I have built several projects, including Footy Debates, a fullstack football analytics web app that lets users compare players and have debates on them.

Tutored peers in web development skills during my trainee program. Also, I am seeking frontend, backend or full-stack internships at tech firms where I can learn how professional teams build software, gain practical experience and contribute on real world tasks.

TECHNICAL SKILLS

Languages: HTML, CSS, JavaScript, TypeScript, Python, C

Frontend: React, Next.js, Tailwind CSS, Zustand, Framer Motion

Backend: Node.js, REST API, Next.js API routes

Tools & Testing: Git, GitHub, Figma, VS Code, Vercel

Concepts: Responsive Design, State Management, Performance Optimisation, Accessibility

PROJECTS

FootyDebates (<https://github.com/Aulli07/FootyIQ.git>)

Tech Used: React, Next.js, Node.js, TypeScript, Tailwind CSS

- Building a football analytics and comparison application for fans to compare and debate on their favourite players.
- A major challenge was integrating the football stats from an API and adapting it to the canonical data and schema used in the project.
- Built a data pipeline that fetches player stats from API-Football and normalizes them into a typed schema, powering stat-by-stat player comparisons. Currently under development.

Alwell.dev (my portfolio) (<https://github.com/Aulli07/My-Portfolio-.git>)

Tech Used: React, Vite, TypeScript, Tailwind CSS, Framer Motion

- Designed and built a responsive portfolio site with the stack above, optimized for better performance and speed, and deployed on Vercel
- A major challenge for me was in the optimisation of images and building for responsiveness

Dashboard UI Clone (<https://github.com/Aulli07/Dashboard-UI-Clone.git>)

Tech Used: React, Vite, JavaScript, Plain CSS

- Built a pixel-accurate, responsive website from a Figma design (Frontend Mentor challenge) using the stack above, ensuring consistent layouts across mobile, tablet, and desktops.
- A challenge I faced during building was restructuring complex desktop layouts into clean, usable tablet and mobile views using flexible grids and breakpoints.

EXPERIENCE

Web Development Trainee — Doubledot Technologies 2019 – 2021

Ogun State, Nigeria

- Built practical web development skills by working on day-to-day projects with HTML, CSS, JavaScript, and React.
- Taught coding lessons to few students, explaining web development concepts and guiding practical exercises.

Retail Sales Assistant — Presswell Enterprises 2022 – 2024

Ogun State, Nigeria

- Managed daily retail operations, customer service, and product organisation.
- Kept daily bookkeeping and sales records, with tracking over 50 transactions done daily

EDUCATION

Bachelor of Science (B.Sc.) — Software Engineering 2024 – 2028

Federal University of Technology, Akure (FUTA), Nigeria

- CGPA: 4.52/5.0
- Relevant coursework: Data Structures and Algorithms (DSA), Requirement Engineering, Software Design and Implementation

Secondary School Leaving Certificate (S.S.C.E) 2017-2022

Precious Scholars School

CERTIFICATIONS, ACHIEVEMENTS & ACTIVITIES

- Completed Frontend Mentor challenges, translating Figma designs into responsive, production-style websites
- Share build-in-public developer content on X (@c_aulli) and LinkedIn

ADDITIONAL

Languages: English (fluent), Pidgin, Yoruba (Mild)
